Volunteers are asked to sign a copy of our Health & Safety at Work form to confirm that they have read the contents and are aware of procedures to protect themselves and others from the risk of accidents.

All volunteers will be informed of the fire drill and of the fire assembly points including fobbing in and out of the building.

Abuse Policy

Volunteers will be given a copy of our Abuse Policy and are asked to inform an appropriate person or organisation if they feel a patient or resident is the victim of abuse.

If you suspect that someone is being abused (by either a relative or a member of staff), a senior member of staff in the Hospital (e.g. the matron) should be informed.

All such information will be treated in strict confidence.

Door Labels

At the Hospital the patients' names are on the inside of doors to protect their confidentiality and residents names (at both the hospital and Nursing Home) are usually found on the outside of the door. Other important labels may be displayed near the name.

- A label depicting an eye means the patient is visually impaired.
- A label depicting an ear means the patient has a hearing impairment.
- A red label means the patient is diabetic. *Please check with nursing staff* before offering biscuits or tea/coffee with sugar.
- A yellow label means the patient has an infection. *Please check with nursing staff* before entering the room.

Call Bells

Each patients and residents room is fitted with a call bell system which alerts nursing staff to the room or area of the hospital/home when the button has been pushed.

If a volunteer enters a room and the patient or resident appears to need nursing/medical assistance, please press the call bell. You can also step outside the room to see if a nurse is nearby. Do not attempt to assist them.
